

August 2011:

**Fayetteville, NC:** United Sleep Medicine of Fayetteville is expanding its current services to include pediatric sleep services and a new CPAP Clinic for the continued care of apnea patients. As a part of the Fayetteville healthcare community for the last five years, we are committed to the estimated 100 million American's with sleep disorders that remain untreated.

Drs. Daniel On-Fai Lee, John W. Gibbs, III, and Rukmini Menon are board-certified sleep physicians concerned with a patient's total care—from consultation, sleep study, diagnosis and treatment, to improvement and release back to their primary care physician for continued care. USM can treat patients from five years old to adults for not only obstructive sleep apnea, but also insomnia, restless leg syndrome, narcolepsy and any other sleep disorder.

Sleep apnea patients treated by our team now also have access to our full service CPAP clinic to help them ease into PAP therapies often used to treat sleep apnea. United Sleep Medicine boasts a CPAP patient compliance rate (continued and consistent use of a CPAP device) of close to 92% compared to the industry average of 55% through therapeutic treatment in our CPAP clinics.

The addition of pediatric sleep care means our physicians are available for consultation and treatment of children five years and older in our family-friendly, safe environment.

The United Sleep Medicine office is located at 2919 Breezewood Ave., Suite 300, Fayetteville, NC 28303. If you would like to speak with someone about your sleep issues, please contact us by email at [info@unitedsleepmedicine.com](mailto:info@unitedsleepmedicine.com) or call us at 910-484-7744.
